Accounting for Joint Ventures Training Course

Professional Development Training Course Outline

Category	ACCOUNTING & FINANCE	**Duration**	5 Days
Base Fee	$1,500 USD	**Delivery Mode**	Online / On-site Hybrid

Course Introduction

Accounting for Joint Ventures is a specialized area within financial reporting that focuses on the recognition, measurement, and disclosure of jointly controlled arrangements between entities. In today's global business environment, joint ventures are increasingly used as strategic partnerships to share resources, risks, and expertise. Accounting for Joint Ventures Training Course provides a comprehensive understanding of IFRS standards, particularly IFRS 11, and how organizations can accurately account for joint arrangements in compliance with international financial reporting requirements.

This training is designed to equip learners with practical and technical knowledge in joint venture accounting, including proportional consolidation, equity method application, financial statement presentation, and risk-sharing structures. With increasing cross-border investments and multinational collaborations, mastering joint venture accounting is essential for accountants, auditors, and financial analysts seeking to enhance their expertise in global financial reporting standards.
