

Advanced Manufacturing Intelligence Training Course

Professional Development Training Course Outline

Category	Manufacturing	Duration	10 Days
Base Fee	\$3,000 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

The Advanced Manufacturing Intelligence Training Course is designed to equip professionals with cutting-edge capabilities in Industry 4.0, Smart Manufacturing, Industrial AI, Digital Twin Technology, IoT-enabled Production Systems, and Data-Driven Manufacturing Optimization. As global industries rapidly transition toward smart factories, autonomous production systems, predictive analytics, and real-time operational intelligence, this training provides a deep, practical understanding of how manufacturing ecosystems are evolving through machine learning, industrial automation, robotics integration, and cyber-physical systems.

Advanced Manufacturing Intelligence Training Course empowers learners to harness Manufacturing Intelligence (MI) for improving productivity, reducing downtime, optimizing supply chains, and enabling predictive maintenance strategies. Participants will gain expertise in big data analytics, edge computing, cloud manufacturing platforms, and AI-driven decision-making systems, enabling them to lead transformation initiatives in modern manufacturing environments. With a strong focus on real-world applications, this training bridges the gap between traditional manufacturing operations and next-generation intelligent production systems powered by smart sensors, digital twins, and industrial IoT (IIoT).

Programme Curriculum

Advanced Manufacturing Intelligence Training Course

Introduction

The Advanced Manufacturing Intelligence Training Course is designed to equip professionals with cutting-edge capabilities in Industry 4.0, Smart Manufacturing, Industrial AI, Digital Twin Technology, IoT-enabled Production Systems, and Data-Driven Manufacturing Optimization. As global industries rapidly transition toward smart factories, autonomous production systems, predictive analytics, and real-time operational intelligence, this training provides a deep, practical understanding of how manufacturing ecosystems are evolving through

machine learning, industrial automation, robotics integration, and cyber-physical systems.

Advanced Manufacturing Intelligence Training Course empowers learners to harness Manufacturing Intelligence (MI) for improving productivity, reducing downtime, optimizing supply chains, and enabling predictive maintenance strategies. Participants will gain expertise in big data analytics, edge computing, cloud manufacturing platforms, and AI-driven decision-making systems, enabling them to lead transformation initiatives in modern manufacturing environments. With a strong focus on real-world applications, this training bridges the gap between traditional manufacturing operations and next-generation intelligent production systems powered by smart sensors, digital twins, and industrial IoT (IIoT).

Course Duration

10 days

Course Objectives

1. Master Industry 4.0 smart factory transformation frameworks
2. Understand Industrial AI and Machine Learning in manufacturing systems
3. Implement Predictive Maintenance using IoT sensor analytics
4. Develop skills in Digital Twin simulation and modeling technologies
5. Optimize production using Real-Time Manufacturing Analytics (RTMA)
6. Apply Big Data analytics in supply chain optimization
7. Integrate Cyber-Physical Systems (CPS) in production environments
8. Enable Autonomous Manufacturing and robotics integration
9. Improve efficiency through Lean Smart Manufacturing strategies
10. Utilize Edge Computing in industrial operations
11. Strengthen Cloud-based Manufacturing Execution Systems (MES)
12. Enhance decision-making with AI-driven process optimization
13. Build expertise in Sustainable and green smart manufacturing systems

Target Audience

1. Manufacturing Engineers
2. Industrial Automation Specialists
3. Data Scientists in Manufacturing
4. Production Managers
5. Supply Chain Analysts
6. Mechanical and Industrial Engineering Students
7. IoT and AI Solution Architects
8. Operations and Plant Managers

Course Modules

Module 1: Industry 4.0 Foundations

- Evolution from Industry 1.0 to 4.0
- Smart factory architecture
- Key enabling technologies
- Digital transformation roadmap
- Industrial use cases
- **Case Study:** Siemens Smart Factory implementation

Module 2: Industrial IoT (IIoT) Systems

- Sensor networks in manufacturing
- Machine-to-machine communication
- IIoT architecture layers
- Data acquisition systems
- Connectivity protocols (MQTT, OPC-UA)
- **Case Study:** Bosch connected manufacturing system

Module 3: Artificial Intelligence in Manufacturing

- Machine learning applications
- Computer vision in quality control
- AI-based defect detection
- Neural networks in production
- Automation decision systems
- **Case Study:** Tesla AI-driven production line

Module 4: Predictive Maintenance Systems

- Failure prediction models
- Vibration and thermal analytics
- Equipment lifecycle optimization
- Condition monitoring systems
- Maintenance scheduling algorithms
- **Case Study:** GE aviation predictive maintenance

Module 5: Digital Twin Technology

- Virtual production modeling
- Real-time simulation systems
- Asset replication techniques
- Performance forecasting
- Digital thread integration
- **Case Study:** Dassault Systèmes digital twin factory

Module 6: Smart Robotics & Automation

- Collaborative robots (Cobots)
- Autonomous guided vehicles (AGVs)
- Robotic process automation (RPA)
- Vision-guided robotics
- Safety systems integration
- **Case Study:** Amazon robotic fulfillment centers

Module 7: Big Data in Manufacturing

- Data lakes and pipelines
- Manufacturing data analytics
- KPI dashboards
- Structured vs unstructured data
- Data governance models

- **Case Study:** Coca-Cola production analytics system

Module 8: Cloud Manufacturing Systems

- Cloud MES platforms
- SaaS manufacturing tools
- Data synchronization systems
- Remote monitoring solutions
- Scalability frameworks
- **Case Study:** Microsoft Azure manufacturing cloud

Module 9: Edge Computing in Industry

- Edge vs cloud processing
- Real-time analytics at edge
- Latency reduction systems
- Edge AI deployment
- Industrial gateways
- **Case Study:** Intel smart edge factories

Module 10: Cyber-Physical Systems (CPS)

- Integration of physical and digital systems
- Smart sensors and actuators
- System interoperability
- Control systems architecture
- Industrial automation loops
- **Case Study:** Boeing smart assembly systems

Module 11: Supply Chain Intelligence

- Predictive supply chain analytics
- Demand forecasting models
- Logistics optimization
- Inventory intelligence systems
- Blockchain in supply chain
- **Case Study:** Walmart smart logistics network

Module 12: Lean Smart Manufacturing

- Waste reduction strategies
- Continuous improvement systems
- Lean digital integration
- Value stream mapping
- Productivity optimization
- **Case Study:** Toyota Production System

Module 13: Cybersecurity in Manufacturing

- Industrial cybersecurity threats
- Network protection systems
- Data encryption protocols

- OT security frameworks
- Risk management strategies
- **Case Study:** Stuxnet industrial cyber incident

Module 14: Sustainable Manufacturing Systems

- Green manufacturing practices
- Energy-efficient production
- Carbon footprint reduction
- Circular economy models
- ESG compliance systems
- **Case Study:** Unilever sustainable production model

Module 15: Future of Manufacturing Intelligence

- Autonomous factories
- Hyper-automation trends
- AI-driven ecosystems
- Human-robot collaboration
- Next-gen industrial innovations
- **Case Study:** Fully automated lights-out factory concept

Training Methodology

This course employs a participatory and hands-on approach to ensure practical learning, including:

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

Register as a group from 3 participants for a Discount

Send us an email: info@fineskilltrainingcenter.org or call +254769199797

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

- a. The participant must be conversant with English.
- b. Upon completion of training the participant will be issued with an Authorized Training Certificate

- c. Course duration is flexible and the contents can be modified to fit any number of days.
- d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- e. One-year post-training support Consultation and Coaching provided after the course.
- f. Payment should be done at least a week before commence of the training, to Fineskill Training Center account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
21 Sep 2026	02 Oct 2026	Online	\$2,000
21 Sep 2026	02 Oct 2026	Physical	\$3,000
21 Sep 2026	02 Oct 2026	Physical	\$0
21 Sep 2026	02 Oct 2026	Physical	\$0
21 Sep 2026	02 Oct 2026	Physical	\$0
21 Sep 2026	02 Oct 2026	Physical	\$0
21 Sep 2026	02 Oct 2026	Physical	\$0
21 Sep 2026	02 Oct 2026	Physical	\$0
