

BIM Data Visualization Dashboards Training Course

Professional Development Training Course Outline

Category	Architectural Engineering	Duration	10 Days
Base Fee	\$3,000 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

In today's data-driven Architecture, Engineering, and Construction (AEC) landscape, BIM Data Visualization Dashboards are transforming how project stakeholders interpret, analyze, and act on complex building information. By integrating Building Information Modeling (BIM) with advanced data analytics, real-time reporting, and interactive dashboards, organizations can unlock powerful insights into project performance, cost control, scheduling, and risk mitigation. Tools like Power BI, Tableau, and Autodesk BIM 360 enable seamless visualization of multidimensional BIM data, enhancing decision-making across the entire project lifecycle.

BIM Data Visualization Dashboards Training Course equips professionals with cutting-edge skills in data integration, visualization design, dashboard development, and predictive analytics tailored for BIM workflows. Participants will learn how to connect BIM models with databases, create interactive KPIs, and deploy cloud-based dashboards for real-time collaboration. With the rise of Digital Twins, AI in construction, and smart infrastructure, mastering BIM dashboarding is becoming a critical competency for future-ready professionals seeking to drive efficiency, sustainability, and innovation in the built environment.

Programme Curriculum

BIM Data Visualization Dashboards Training Course

Introduction

In today's data-driven Architecture, Engineering, and Construction (AEC) landscape, BIM Data Visualization Dashboards are transforming how project stakeholders interpret, analyze, and act on complex building information. By integrating Building Information Modeling (BIM) with advanced data analytics, real-time reporting, and interactive dashboards, organizations can unlock powerful insights into project performance, cost control, scheduling, and risk mitigation. Tools like Power BI, Tableau, and Autodesk BIM 360 enable seamless

visualization of multidimensional BIM data, enhancing decision-making across the entire project lifecycle.

BIM Data Visualization Dashboards Training Course equips professionals with cutting-edge skills in data integration, visualization design, dashboard development, and predictive analytics tailored for BIM workflows. Participants will learn how to connect BIM models with databases, create interactive KPIs, and deploy cloud-based dashboards for real-time collaboration. With the rise of Digital Twins, AI in construction, and smart infrastructure, mastering BIM dashboarding is becoming a critical competency for future-ready professionals seeking to drive efficiency, sustainability, and innovation in the built environment.

Course Duration

10 days

Course Objectives

1. Master BIM Data Integration with real-time analytics
2. Develop interactive dashboards using modern BI tools
3. Implement data-driven decision-making in construction projects
4. Apply AI-powered insights to BIM datasets
5. Design user-centric visualization interfaces
6. Utilize cloud-based BIM platforms for collaboration
7. Optimize project performance tracking dashboards
8. Create predictive analytics models for risk management
9. Integrate IoT data streams into BIM dashboards
10. Build Digital Twin visualization frameworks
11. Enhance cost and schedule visualization techniques
12. Automate data pipelines and reporting workflows
13. Ensure data governance and cybersecurity compliance

Target Audience

- BIM Engineers and Coordinators
- Architects and Design Professionals
- Construction Project Managers
- Data Analysts in AEC Industry
- Civil and Structural Engineers
- Facility Managers and Asset Managers
- Digital Transformation Consultants
- Students and Researchers in BIM & Smart Cities

Course Modules

Module 1: Introduction to BIM & Data Visualization

- BIM fundamentals and lifecycle
- Role of data visualization in AEC
- Overview of dashboard tools
- Data types in BIM models
- Case Study: BIM adoption in smart city projects

Module 2: BIM Data Structures & Standards

- IFC, COBie standards
- Data schemas and interoperability
- Structured vs unstructured data
- Data extraction techniques
- Case Study: Standardized BIM workflows

Module 3: Data Analytics for BIM

- Basics of data analytics
- KPI identification for projects
- Data cleaning and transformation
- Visualization-ready datasets
- Case Study: Project performance analytics

Module 4: Dashboard Design Principles

- UI/UX best practices
- Visual storytelling techniques
- Color theory and layout
- User interaction design
- Case Study: Effective dashboard design

Module 5: Tools for BIM Visualization

- Overview of **Power BI**
- Using **Tableau**
- Integration with **Autodesk Revit**
- Data connectors and APIs
- Case Study: Multi-tool integration

Module 6: Data Integration Techniques

- Linking BIM with databases
- API-based data extraction
- Cloud data integration
- Real-time data streaming
- Case Study: Integrated BIM dashboards

Module 7: Advanced Dashboard Development

- Interactive filters and drill-downs
- Dynamic reporting
- Custom visuals creation
- Embedding dashboards
- Case Study: Executive dashboards

Module 8: Cloud-Based BIM Dashboards

- Cloud platforms overview
- Collaboration workflows
- Data synchronization
- Security considerations

- Case Study: Cloud BIM implementation

Module 9: IoT & Real-Time Data in BIM

- IoT integration concepts
- Sensor data visualization
- Real-time monitoring dashboards
- Smart building analytics
- Case Study: IoT-enabled construction site

Module 10: Digital Twin Visualization

- Digital Twin concepts
- BIM to Digital Twin transition
- Simulation and visualization
- Predictive maintenance dashboards
- Case Study: Smart infrastructure project

Module 11: AI & Predictive Analytics

- AI applications in BIM
- Machine learning basics
- Predictive modeling
- Risk analysis dashboards
- Case Study: AI-driven construction insights

Module 12: Cost & Schedule Visualization

- 4D and 5D BIM concepts
- Budget tracking dashboards
- Schedule performance metrics
- Earned value analysis
- Case Study: Cost optimization

Module 13: Automation & Workflow Optimization

- Data pipeline automation
- Script-based integrations
- Workflow optimization
- Reporting automation
- Case Study: Automated BIM reporting

Module 14: Data Governance & Security

- Data privacy regulations
- Cybersecurity in BIM
- Access control
- Data quality management
- Case Study: Secure BIM environment

Module 15: Capstone Project

- End-to-end dashboard development

- Real-world dataset application
- Presentation and storytelling
- Peer review and feedback
- Case Study: Industry-level project

Training Methodology

This course employs a participatory and hands-on approach to ensure practical learning, including:

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

Register as a group from 3 participants for a Discount

Send us an email: info@fineskilltrainingcenter.org or call +254769199797

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

- The participant must be conversant with English.
- Upon completion of training the participant will be issued with an Authorized Training Certificate
- Course duration is flexible and the contents can be modified to fit any number of days.
- The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- One-year post-training support Consultation and Coaching provided after the course.
- Payment should be done at least a week before commence of the training, to Fineskill Training Center account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
------------	----------	----------	-------

21 Sep 2026	02 Oct 2026	Online	\$2,000
21 Sep 2026	02 Oct 2026	Physical	\$3,000
21 Sep 2026	02 Oct 2026	Physical	\$0
21 Sep 2026	02 Oct 2026	Physical	\$0
21 Sep 2026	02 Oct 2026	Physical	\$0
21 Sep 2026	02 Oct 2026	Physical	\$0
21 Sep 2026	02 Oct 2026	Physical	\$0
21 Sep 2026	02 Oct 2026	Physical	\$0
