

ISO 9001:2015 Quality Management Systems Lead Auditor Training Course

Professional Development Training Course Outline

Category	Quality Assurance and ISO standards	Duration	10 Days
Base Fee	\$3,000 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

The ISO 9001:2015 Quality Management Systems Lead Auditor Training Course is designed to provide professionals with the practical knowledge and skills necessary to plan, conduct, and manage audits against ISO 9001:2015 requirements. This course equips participants with globally recognized auditing techniques, industry-leading best practices, and a clear understanding of compliance standards. With a strong focus on audit planning, execution, and reporting, the training empowers learners to meet international standards while delivering measurable quality outcomes within organizations.

Through this course, participants will explore trending concepts such as risk-based thinking, continual improvement, evidence-based decision-making, and customer satisfaction as key components of a Quality Management System (QMS). Learners will also be guided on how to manage audit teams, address non-conformities, and ensure compliance with international quality benchmarks. The training emphasizes case studies and real-world scenarios to strengthen problem-solving skills, making participants competent lead auditors capable of driving sustainable organizational growth.

Programme Curriculum

ISO 9001:2015 Quality Management Systems Lead Auditor Training Course

Introduction

The ISO 9001:2015 Quality Management Systems Lead Auditor Training Course is designed to provide professionals with the practical knowledge and skills necessary to plan, conduct, and manage audits against ISO 9001:2015 requirements. This course equips participants with globally recognized auditing techniques, industry-leading best practices, and a clear understanding of compliance standards. With a strong focus on audit planning, execution, and reporting, the training empowers learners to meet international standards while

delivering measurable quality outcomes within organizations.

Through this course, participants will explore trending concepts such as risk-based thinking, continual improvement, evidence-based decision-making, and customer satisfaction as key components of a Quality Management System (QMS). Learners will also be guided on how to manage audit teams, address non-conformities, and ensure compliance with international quality benchmarks. The training emphasizes case studies and real-world scenarios to strengthen problem-solving skills, making participants competent lead auditors capable of driving sustainable organizational growth.

Course Objectives

1. Understand the purpose, principles, and benefits of ISO 9001:2015 Quality Management Systems.
2. Develop auditing skills aligned with international ISO 19011 guidelines.
3. Gain expertise in risk-based thinking and process-based auditing.

- Sources and types of audit evidence
- Collecting objective and reliable data
- Using sampling techniques
- Analyzing and interpreting audit evidence
- Supporting decisions with factual data
- Case study: Evidence-based auditing in a financial services company

Module 11: Internal Audits and External Certification Audits

- Differences between internal and external audits
- Certification body requirements
- Preparing organizations for certification audits
- Managing stakeholder expectations
- Follow-up audits and surveillance audits
- Case study: Certification audit process in a retail organization

Module 12: Performance Evaluation and Continual Improvement

- Monitoring and measuring organizational performance

- KPIs in quality management
- Role of internal audits in continual improvement
- Benchmarking and best practices
- Driving innovation through quality improvements
- Case study: Performance evaluation in an automotive industry

Module 13: Managing Audit Programs

- Establishing and maintaining audit programs
- Setting objectives and priorities
- Resource allocation for audits
- Monitoring audit program performance
- Continual improvement of audit programs
- Case study: Implementing an audit program in an IT company

Module 14: Advanced Reporting and Communication Skills

- Professional communication in auditing
- Using audit software tools
- Advanced reporting techniques
- Presenting audit results to top management
- Ensuring confidentiality and data security
- Case study: Advanced reporting in a pharmaceutical audit

Module 15: Final Assessment and Practical Application

- Comprehensive review of all modules
- Role-playing audit scenarios
- Group discussions and exercises
- Individual and team assignments
- Preparation for final lead auditor exam
- Case study: End-to-end audit simulation for a large enterprise

Training Methodology

- Instructor-led interactive sessions
- Group discussions and brainstorming
- Practical exercises and simulations
- Case study analysis and role-play
- Mock audits and feedback sessions
- Continuous assessment through assignments
