

Smart Hospitals Infrastructure Design Training Course

Professional Development Training Course Outline

Category	Architectural Engineering	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

The Smart Hospitals Infrastructure Design Training Course is a cutting-edge professional program developed to equip healthcare architects, engineers, facility managers, and digital health innovators with the skills to design, implement, and manage next-generation intelligent healthcare infrastructure. As global healthcare systems rapidly transition toward AI-powered hospitals, IoT-enabled medical environments, and data-driven patient care ecosystems, the demand for integrated smart infrastructure design is accelerating. Smart Hospitals Infrastructure Design Training Course provides a deep dive into digital hospital transformation, BIM-enabled healthcare planning, energy-efficient hospital systems, and smart clinical workflow optimization, ensuring participants can deliver future-ready healthcare facilities.

With increasing adoption of 5G-enabled healthcare systems, smart ICU monitoring, telemedicine infrastructure, robotic surgery integration, and hospital automation systems, this training bridges the gap between traditional healthcare facility design and modern digital hospital ecosystems. Participants will learn how to integrate building automation systems (BAS), hospital information systems (HIS), electronic medical records (EMR), and AI-based predictive maintenance systems into hospital infrastructure. The course emphasizes sustainability, resilience, cybersecurity in healthcare infrastructure, and patient-centric smart hospital ecosystems aligned with global healthcare standards and smart city frameworks.

Programme Curriculum

Smart Hospitals Infrastructure Design Training Course

Introduction

The Smart Hospitals Infrastructure Design Training Course is a cutting-edge professional program developed to equip healthcare architects, engineers, facility managers, and digital health innovators with the skills to design,

implement, and manage next-generation intelligent healthcare infrastructure. As global healthcare systems rapidly transition toward AI-powered hospitals, IoT-enabled medical environments, and data-driven patient care ecosystems, the demand for integrated smart infrastructure design is accelerating. Smart Hospitals Infrastructure Design Training Course provides a deep dive into digital hospital transformation, BIM-enabled healthcare planning, energy-efficient hospital systems, and smart clinical workflow optimization, ensuring participants can deliver future-ready healthcare facilities.

With increasing adoption of 5G-enabled healthcare systems, smart ICU monitoring, telemedicine infrastructure, robotic surgery integration, and hospital automation systems, this training bridges the gap between traditional healthcare facility design and modern digital hospital ecosystems. Participants will learn how to integrate building automation systems (BAS), hospital information systems (HIS), electronic medical records (EMR), and AI-based predictive maintenance systems into hospital infrastructure. The course emphasizes sustainability, resilience, cybersecurity in healthcare infrastructure, and patient-centric smart hospital ecosystems aligned with global healthcare standards and smart city frameworks.

Course Duration

5 days

Course Objectives

1. Master Smart Hospital Architecture Design Principles
2. Understand AI-Driven Healthcare Infrastructure Planning
3. Implement IoT-Based Medical Facility Integration Systems
4. Design Digital Twin Hospital Ecosystems using BIM Technology
5. Develop expertise in Energy-Efficient Green Hospital Design
6. Apply Hospital Automation & Intelligent Workflow Systems
7. Integrate Telemedicine and Remote Care Infrastructure Models
8. Build Cybersecure Healthcare Data Infrastructure Systems
9. Optimize Patient-Centric Smart Care Delivery Environments
10. Deploy 5G-Enabled Hospital Connectivity Frameworks
11. Design Smart ICU and Critical Care Monitoring Systems
12. Understand Predictive Maintenance in Hospital Infrastructure
13. Align hospital design with Global Smart Healthcare Standards (WHO, ISO, HL7)

Target Audience

1. Healthcare Infrastructure Architects
2. Biomedical & Clinical Engineers
3. Hospital Facility Managers
4. Construction & MEP Consultants
5. Smart City Healthcare Planners
6. Health IT & Digital Transformation Specialists
7. Government Healthcare Policy Planners
8. Medical Equipment Integration Contractors

Course Modules

Module 1: Smart Hospital Design Fundamentals

- Principles of intelligent healthcare infrastructure

- Evolution from traditional to smart hospitals
- Core components of digital hospital ecosystems
- Regulatory frameworks & compliance standards
- Sustainability in hospital infrastructure design
- **Case Study:** Smart transformation of a mid-sized urban hospital into an IoT-enabled healthcare facility with real-time patient monitoring systems.

Module 2: AI & IoT in Healthcare Infrastructure

- IoT-enabled medical device integration
- AI-based hospital operations management
- Sensor networks for patient monitoring
- Smart asset tracking systems
- Predictive analytics in hospital operations
- **Case Study:** Implementation of IoT-based smart ward system reducing patient response time by 40%.

Module 3: BIM & Digital Twin Hospitals

- BIM modeling for healthcare facilities
- Digital twin simulation for hospital operations
- Real-time infrastructure monitoring
- Lifecycle management of hospital assets
- Virtual commissioning of healthcare buildings
- **Case Study:** Digital twin simulation used to redesign emergency department workflow for faster patient intake.

Module 4: Smart ICU & Critical Care Systems

- Intelligent ICU monitoring systems
- Automated ventilator and life-support integration
- Remote patient monitoring systems
- AI-driven alert systems for critical care
- Smart bed and environment optimization
- **Case Study:** AI-powered ICU reducing mortality response delays through predictive alerts.

Module 5: Healthcare Cybersecurity Infrastructure

- Hospital data protection frameworks
- Cybersecurity risks in smart hospitals
- Secure EMR and HIS integration
- Network security architecture
- Compliance with healthcare data laws
- **Case Study:** Cybersecurity upgrade preventing ransomware attack in a hospital network system.

Module 6: Energy-Efficient & Green Hospitals

- Sustainable hospital design principles
- Smart energy management systems
- Renewable energy integration in hospitals
- Water and waste management automation
- Carbon-neutral healthcare facilities

- **Case Study:** Green hospital achieving 30% energy reduction using smart HVAC and solar integration.

Module 7: Telemedicine & Remote Healthcare Infrastructure

- Telehealth system architecture
- Remote diagnostics infrastructure
- 5G-enabled healthcare delivery systems
- Virtual consultation platforms
- Integration with hospital systems
- **Case Study:** Rural telemedicine network connecting remote clinics to urban specialist hospitals.

Module 8: Hospital Automation & Smart Operations

- Robotic process automation in hospitals
- Smart logistics and pharmacy systems
- Automated patient flow management
- AI-based scheduling systems
- Integrated hospital command centers
- **Case Study:** Fully automated hospital pharmacy reducing medication errors by 60%.

Training Methodology

This course employs a participatory and hands-on approach to ensure practical learning, including:

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

Register as a group from 3 participants for a Discount

Send us an email: info@fineskilltrainingcenter.org or call +254769199797

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

- a. The participant must be conversant with English.
- b. Upon completion of training the participant will be issued with an Authorized Training Certificate
- c. Course duration is flexible and the contents can be modified to fit any number of days.

- d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- e. One-year post-training support Consultation and Coaching provided after the course.
- f. Payment should be done at least a week before commence of the training, to Fineskill Training Center account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
21 Sep 2026	25 Sep 2026	Online	\$1,000
21 Sep 2026	25 Sep 2026	Physical	\$1,500
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
