

Smart Passenger Processing Training Course

Professional Development Training Course Outline

Category	Aviation and Airport Management	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

Smart Passenger Processing is transforming the future of aviation through digital transformation, biometric identity management, artificial intelligence, automation, seamless passenger journeys, and data-driven airport operations. Airports worldwide are investing in smart technologies to enhance passenger experience, improve operational efficiency, strengthen border security, and optimize resource utilization. Smart Passenger Processing Training Course equips aviation professionals with practical knowledge of next-generation passenger processing systems, self-service technologies, biometric authentication, digital identity verification, integrated airport systems, and smart terminal innovations aligned with international aviation standards.

The course explores emerging technologies supporting end-to-end passenger processing, including self-check-in, automated bag drop, biometric boarding, e-Gates, mobile travel credentials, predictive analytics, cybersecurity, and integrated airport management platforms. Participants will learn global best practices, implementation strategies, operational optimization techniques, and innovation frameworks that improve service quality, passenger satisfaction, regulatory compliance, and airport competitiveness while supporting sustainable and resilient airport operations.

Programme Curriculum

Smart Passenger Processing Training Course

Introduction

Smart Passenger Processing is transforming the future of aviation through digital transformation, biometric identity management, artificial intelligence, automation, seamless passenger journeys, and data-driven airport operations. Airports worldwide are investing in smart technologies to enhance passenger experience, improve operational efficiency, strengthen border security, and optimize resource utilization. Smart Passenger

Processing Training Course equips aviation professionals with practical knowledge of next-generation passenger processing systems, self-service technologies, biometric authentication, digital identity verification, integrated airport systems, and smart terminal innovations aligned with international aviation standards.

The course explores emerging technologies supporting end-to-end passenger processing, including self-check-in, automated bag drop, biometric boarding, e-Gates, mobile travel credentials, predictive analytics, cybersecurity, and integrated airport management platforms. Participants will learn global best practices, implementation strategies, operational optimization techniques, and innovation frameworks that improve service quality, passenger satisfaction, regulatory compliance, and airport competitiveness while supporting sustainable and resilient airport operations.

Course Objectives

By the end of this course participants will be able to:

1. Understand smart passenger processing concepts and digital airport ecosystems.
2. Implement biometric identity management solutions.
3. Optimize passenger journey mapping using digital technologies.
4. Enhance operational efficiency through automation and AI.
5. Improve airport customer experience using smart technologies.
6. Integrate self-service passenger processing systems.
7. Strengthen aviation cybersecurity for passenger processing platforms.
8. Analyze passenger flow using predictive analytics.
9. Apply ICAO and IATA smart airport standards.
10. Manage smart border control and immigration technologies.
11. Develop digital transformation strategies for passenger terminals.
12. Improve airport resilience through intelligent operational planning.
13. Evaluate future innovations in smart passenger processing.

Organizational Benefits

- Faster passenger processing and reduced queues.
- Improved passenger satisfaction and service quality.
- Enhanced airport operational efficiency.
- Increased biometric security and identity verification.
- Better utilization of airport infrastructure.
- Reduced operational costs through automation.
- Improved regulatory compliance.
- Enhanced data-driven decision making.
- Increased airport competitiveness.
- Stronger resilience during operational disruptions.

Target Audience

- Airport Operations Managers
- Terminal Managers
- Airline Operations Personnel

- Passenger Service Supervisors
- Border Control Officers
- Airport Security Professionals
- Aviation Technology Specialists
- Airport Digital Transformation Teams

Course Duration:

5 days

Course Modules

Module 1: Smart Passenger Processing Fundamentals

- Digital transformation in passenger processing
- Smart airport ecosystem overview
- Passenger journey optimization
- Global aviation digital trends
- ICAO and IATA smart passenger frameworks
- Case Study: Singapore Changi Airport Smart Passenger Processing

Module 2: Self-Service Passenger Technologies

- Self-check-in kiosks
- Automated bag drop systems
- Mobile boarding technologies
- Digital travel documentation
- Contactless passenger services
- Case Study: Amsterdam Schiphol Self-Service Operations

Module 3: Biometric Passenger Processing

- Facial recognition technologies
- Biometric identity verification
- e-Gates implementation
- Mobile digital identity
- Privacy and biometric governance
- Case Study: Dubai International Airport Biometric Journey

Module 4: Passenger Flow Optimization

- Passenger flow analytics
- Queue management systems

- Capacity planning
- Predictive demand forecasting
- Real-time operational dashboards
- Case Study: Heathrow Airport Passenger Flow Management

Module 5: Smart Security and Border Processing

- Automated security screening
- Smart immigration systems
- Risk-based passenger screening
- Cybersecurity for passenger systems
- Integrated border management
- Case Study: Hamad International Airport Smart Security

Module 6: Artificial Intelligence in Passenger Processing

- AI-powered passenger forecasting
- Intelligent resource allocation
- Machine learning applications
- Predictive operational analytics
- AI-enabled customer engagement
- Case Study: Incheon International Airport AI Operations

Module 7: Integrated Airport Operations

- Airport collaborative decision making
- System interoperability
- Airport Operations Control Center integration
- Data sharing platforms
- Smart terminal performance monitoring
- Case Study: Hong Kong International Airport Integrated Operations

Module 8: Future Smart Passenger Processing

- Digital identity ecosystems
- Next-generation passenger technologies
- Sustainability and smart airports
- Innovation strategy development
- Continuous improvement frameworks
- Case Study: Helsinki Airport Digital Passenger Experience

Training Methodology

- Interactive expert-led presentations.
- Practical demonstrations of smart passenger technologies.
- Group discussions and collaborative learning.
- Hands-on case study analysis.
- Scenario-based passenger processing simulations.
- Digital workflow exercises.
- AI and biometric technology demonstrations.
- Problem-solving workshops.
- Knowledge assessments and feedback sessions.
- Action planning for workplace implementation.

Register as a group from 3 participants for a Discount

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

- The participant must be conversant with English.
- Upon completion of training the participant will be issued with an Authorized Training Certificate
- Course duration is flexible and the contents can be modified to fit any number of days.
- The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- One-year post-training support Consultation and Coaching provided after the course.
- Payment should be done at least a week before commence of the training, to Fineskill Training Center account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
------------	----------	----------	-------

21 Sep 2026	25 Sep 2026	Online	\$1,000
21 Sep 2026	25 Sep 2026	Physical	\$1,500
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
