

Training Course on Public Procurement, Supply Chain and Contract Management

Professional Development Training Course Outline

Category	Business	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

Public procurement, supply chain, and contract management play pivotal roles in ensuring the efficiency and transparency of government projects and services. The Training Course on Public Procurement, Supply Chain & Contract Management is designed to equip professionals with the essential skills and knowledge required to manage procurement and supply chain processes in public sector organizations. This course focuses on international standards, best practices, and practical tools that will help streamline public procurement and contract management for enhanced accountability, compliance, and operational success.

As public procurement processes are governed by strict rules and regulations, understanding the complexities of procurement, supply chain operations, and contract management is critical. This course provides an in-depth overview of the procurement lifecycle, from planning and sourcing to contract execution and performance monitoring. Participants will also gain insights into risk management, ethical procurement practices, and strategies for managing public funds effectively.

Programme Curriculum

Training Course on Public Procurement, Supply Chain and Contract Management

Introduction

Public procurement, supply chain, and contract management play pivotal roles in ensuring the efficiency and transparency of government projects and services. Training Course on Public Procurement, Supply Chain and Contract Management is designed to equip professionals with the essential skills and knowledge required to manage procurement and supply chain processes in

public sector organizations. This course focuses on international standards, best practices, and practical tools that will help streamline public procurement and contract management for enhanced accountability, compliance, and operational success.

As public procurement processes are governed by strict rules and regulations, understanding the complexities of procurement, supply chain operations, and contract management is critical. This course provides an in-depth overview of the procurement lifecycle, from planning and sourcing to contract execution and performance monitoring. Participants will also gain insights into risk management, ethical procurement practices, and strategies for managing public funds effectively.

Effective contract management and an efficient supply chain are essential to meet the demands of modern governance and development goals. Through case studies, group exercises, and interactive discussions, this course will help participants sharpen their ability to negotiate, manage, and monitor contracts, and optimize procurement processes. Whether you're working in a government department, NGO, or large public sector organization, this course will help you navigate the complexities of procurement and ensure that contracts are managed to meet organizational objectives.

Course Duration

5 Days

Course Objectives

1. Understand the principles, regulations, and policies governing public procurement and contract management.
2. Learn to plan, manage, and execute procurement processes effectively.
3. Gain skills in managing supply chain activities in public sector projects.
4. Master contract negotiation techniques and develop best practices in contract management.
5. Understand the roles and responsibilities of procurement professionals in public sector organizations.
6. Learn to identify and mitigate risks associated with procurement and contracts.
7. Develop knowledge of ethical procurement practices and their importance in transparency.
8. Learn to monitor and evaluate procurement and contract performance effectively.
9. Acquire skills to manage and optimize the lifecycle of contracts and procurement processes.
10. Build the ability to apply procurement and contract management strategies to enhance public sector outcomes.

Organizational Benefits

1. Enhance procurement efficiency, reducing delays and costs in public projects.
2. Improve compliance with procurement regulations, reducing legal risks and potential violations.
3. Strengthen the effectiveness of supply chain management in public sector projects.
4. Foster greater transparency and accountability in public procurement and contract execution.

5. Improve contract performance and reduce disputes through better contract management practices.
6. Streamline procurement processes to ensure timely delivery of goods and services.
7. Mitigate procurement risks by understanding market conditions, supplier capacity, and delivery issues.
8. Strengthen the capacity of procurement teams with up-to-date skills and knowledge.
9. Enhance the management of public funds and ensure the best value for money in procurement.
10. Contribute to achieving organizational goals and improving service delivery through optimized procurement and contract management.

Target Participants

- Public sector procurement officers and managers.
- Contract managers and officers working in government agencies or public organizations.
